

Book Title: Polar Bears and the Arctic

Author: Mary Pope Osborne and Natalie Pope Boyce

Publisher: Random House

'Polar Bears and the Arctic' was written by Mary Pope Osborne and Natalie Pope Boyce. The publisher is Random House. It talks about the Arctic beautiful view and Arctic animals such as polar bears, gray whales, lemmings, Arctic hares, arctic wolves, snowy owls and seals. They are all very cute and I love them very much. I really want to see all these arctic animals. This book also talks about the weather of Arctic region. In Arctic region, the weather is very cold. Very few people live there. And it is very amazing that half year is all daytime and the other half is all nighttime there. It is very different from other countries. I really want to travel in the Arctic region.

I like this book very much because the Arctic animals such as polar bears, lemmings, Arctic hares (a kind of rabbit) and wolverines are very cute. I like them very much. I really want to go to the Arctic region once because I want to see the Northern Lights. I always see the photos of the Northern Lights. It is very beautiful. I think I will be very happy and amazed if I can see the Northern Lights.
