Book Title : The BFG

Author : Roald Dahl

Publisher : Scholastic

This book talks about a girl called Sophie Dahl and her fantasy adventure. One night, Sophie could not fall asleep during the witching hour. As the moonbeam was shining brightly, Sophie's curiosity drove her to find out what happened outside the window. There was a giant outside the street and the giant was blowing dreams to children! The giant brought Sophie to his home-desert cave with a rock door. The giant wanted the help from Sophie because there was not only one giant in the world. Instead, there were different kinds of giants. But they were very different! Other giants ate humans all around the world but this giant only ate vegetables, and he disliked snozzcumpers too. This was also why this giant named himself as The Big Friendly Giant (BFG). While they were talking, the evil giants were discussing who to be eaten next. The BFG could hear everything, so he knew what was happening. He blew dreams to the Queen of England and Sophie sat next to the window of the Palace. Lastly, the BFG, Sophie and the queen planned to stop the evil giants. Will they succeed in stopping the evil giants to kill the children?

My favorite character is the Big Friendly Giant. Although he is not a human, his kindness really attracts me. He is the only giant who does not eat humans and is willing to save humans. I like this character really much as it represents true kindness in a living creature and he is really lovely and adorable. Besides, he keeps collecting nice dreams and blows them into the bedrooms of sleeping children. He keeps bringing happiness to the ones he does not really know. Therefore, I really appreciate his selfless action. Also, I think he is funny, as he cannot speak perfect English and only makes some nonsensical utterances. For example, when he talked about

elephants, he said elefant and he always said "I is ...". Also, I think he is a good friend. After he caught Sophie, he did not hurt her but took good care of her. Besides, I think Sophie is quite brave, she is young but she did an outstanding thing-saving the world from the evil giants.

There are some points that are quite impressive to me. For example, the BFG mentioned that there were no creatures like humans who killed their own kind. It may not be exactly right, because there are wars on earth when humans kill each other. In the past, there were world wars that killed many people. People used different weapons to kill their own kind. How cruel the humans were! On the other hand, to think deeply, there are still many people with nice hearts. People in the same community always help each other. Some of them even help the ones they do not know, such as the poor. Another point is that humans can make friends with the ones who do not look the same like us. Like Sophie and the BFG, they became friends and worked together to save the humans.

The book is interesting, inspiring and easy to read. It is so amazing that this book has been sold for 20 years but never been outdated. The theme of this book is about good versus evil. It also shows that someone looking unusual or scary does not mean he is evil. We can't judge others by how they look. We can only judge others by their behavior. I would definitely recommend the book to my friends.
